

Using CSS and HTML, I created a mock mirror image of the band Billy Talent's home page using a table for the tour date, I also implemented a pulse feature on "Tickets Available Now" text to change colors and imported a Google font to mirror the actual pages site.

### FAVORITE SONG LYRICS

*I stumble through the wreckage, rusted from the rain There's nothing left to salvage, no one left to blame Among the broken mirrors I don't look the same I'm rusted from the rain, I'm rusted from the rain*

*Can't you see there is no logic to love And we're lost just like the stars up above If I'd only known how you'd make me feel I would kiss the ground that touches your heel After all these years of being apart Don't let reason try to tear us apart*

*We spent a life together That should have lasted forever But now it's time to sail on So take this anchor from my heart So we can finally drift apart Before we drown in sorrow*
